[Xf A2010 64bits 80](#)

The screenshot shows the Windows Settings application, specifically the 'UPDATE & SECURITY' section. The 'Activation' option is selected in the left-hand navigation pane. A search bar at the top right contains the text 'a setting'. A search result for 'Error code: 0xC004C003' is displayed, with a description: 'Error description: The activation server determined that the specified product key has been blocked.' Below the error message, there are links for 'Error details' and 'Learn more about why you're seeing this issue'. A 'Change product key' button is visible. Under the heading 'Your product key info', the current product key is shown as '*****- 6MT6Y'. A note states: 'Your product key should be on the box that the Windows DVD came in or in an email that shows you've bought Windows.' Below this, it says 'The product key looks similar to this:' followed by the example 'PRODUCT KEY: XXXXX-XXXXX-XXXXX-XXXXX-XXXXX'.
